- (1) In H1 FY21, the Group recognised impairment losses of \$6.0m (H1 FY20: \$0.6m) predominantly relating to the additional recognition of expected credit losses in trade receivables. The increase in impairment losses of trade receivables was a result of increase credit risk due to the re-evaluation of adverse effects of COVID-19 in certain regions where the Group's trade receivables operate, especially in Latin America where the second wave of COVID-19 has severely impacted operators in this region. In addition, impairment losses related to property, plant and equipment and leased assets of \$23.2m was recognised in H1 FY21 (H1 FY20: nil). This was based on an impairment analysis of the Group's cash generating units ("CGU") at 31 December 2020. The carrying amount of the Latin America CGU was determined to be higher than its recoverable amount due to the severe impacts experienced of a second wave of COVID-19 resulting in further closures and restrictions being introduced in November and December periods.
